This face-to-face afternoon event will be a refresher and updated workshop on "The Importance of an Engagement Agreement, as well as discussing PI Insurance. Your engagement agreement should allow you some flexibility to respond to a rapidly changing insurance environment - including to increase your fees under the agreement at regular intervals to better cater for cost increases in such things as insurance premiums. Much of the discussion in this instalment of the importance of engagement agreements will focus on the flexibility in your current agreements to better protect you against further changes in the professional indemnity insurance market for private certifiers."
